SUMMARY

Passionate and motivated data analyst eager to leverage skills and knowledge to help organization by digging deep into complex datasets to uncover valuable insights that drive business decisions.

SKILLS

SQL- Data types, Queries, Aggregate functions, Subqueries, Joins, CTEs, Window functions

Excel - Count if, Sum if, VLOOKUP, XLOOKUP, Index, Match, VBA, Macros, Pivot Table, Pivot charts

Power BI - Data Reporting, DAX, Data Modelling, Data Cleaning, ETL, Data Visualization, Custom visuals

Python - Pandas, NumPy

EDUCATION

2023 – Present

Centurion University Of Technology And Management

B Tech in Computer Science

CGPA – 8.3/10

PROJECTS

Business Insight 360 -Brick Mortar and E-Commerce [Power BI | MySQL | Excel | Dax Studio]

Nov 2025

[GITHUB REPO](#)

- Designed a multi-view dashboard in Power BI for various departments including (finance, supply chain, executive management) of AtliQ hardware to understand trends and facilitate data-driven decisions, which aimed to scale the business processes by 10%
- Transformed and wrangled over 1.8 million records from two data sources (MySQL and Excel) for analysis in Power BI.
- Enhanced report efficiency by 30% and boosted performance by 10% using DAX Studio. Managed stakeholder expectations and requirements, fostering collaborative decision-making across departments.

Hospitality Analysis - Hotel Chain Business [Power BI | Excel]

Dec 2025

[GITHUB REPO](#) | [LIVE DASHBOARD](#)

- Built dynamic Power BI dashboard to monitor hotel KPIs including revenue, occupancy rate, ADR, and RevPAR
- Performed data cleaning and transformation using Excel and Power BI to ensure accurate analysis
- Discovered revenue decline patterns and provided actionable insights to optimize pricing and operations
- Delivered insights that supported strategic decisions, targeting a 20% increase in revenue and market presence

P&L Report - [Excel | Pivot Table | Power Query]

Dec 2025

[GITHUB REPO](#)

- Generated a detailed P&L report for AtliQ Hardware FY 2022, employing advanced Excel features like Pivot Tables, Power Pivot and DAX to deliver granular insights into revenue streams and expense categories across over 1.8 million records.
- Automated data cleansing with Power Query, saving approximately 4 hours of manual effort and adapted to using DAX measures for calculations, which provided a better user experience and flexibility

Netflix Data Analysis-[Python | Pandas]

Jan 26

[GITHUB REPO](#)

- Identified key insights such as content distribution, genre trends, and country-wise production Patterns
- Created visualizations to highlight yearly growth and audience trends
- Improved decision-making insights by applying data aggregation and statistical analysis techniques.
